ROLL CALL

Motion: Ms. Kash moved, seconded by Mr. Schul to excuse absent board members.

Roll call vote: Yes-4 (Davis, Kash, Bonnell, Schul). No-0. Motion Passed.

CITIZEN COMMENTS

None.

APPROVAL OF MINUTES- November 2022

Motion: Mr. Schul moved, seconded by Ms. Kash to approve the November 2022 Board of Health meeting minutes.

Roll call vote: Yes-4 (Davis, Kash, Bonnell, Schul). No-0. Motion Passed.

RECEIVE AND FILE FINANCIAL REPORT-November 2022

Motion: Ms. Kash moved, seconded by Mr. Schul to receive and file the November 2022 Financial Report.

Roll call vote: Yes-4 (Davis, Kash, Bonnell, Schul). No-0. Motion Passed.

Education Presentation- Middletown Connect-OHIZ Grant-Kristy Duritsch

Ms. Duritsch provided the board of health with an overview of the Ohio Health Improvement Zone (OHIZ) Grant. Ms. Duritsch explained that the OHIZ Pilot Project is a place-based initiative seeking to foster health equity, address social determinants of health, and improve healthy behaviors through meaningful community engagement and cross-sector collaboration.

The Ohio Department of Health grant was awarded to the Safety Council of Southwestern Ohio in partnership with the City of Middletown Health Department. Ms. Duritsch provided the board with a timeline which included receiving notification of the award in August 2022, establishing priorities by December 2022 and implementation by February 2023. Pieces of the OHIZ Grant include: a fiscal agent, Strategic Innovations Group, Health Improvement Partners (HIP Team), Core Team, Community Ambassadors, monthly deliverables, key activity-engage and assess and key activity-engage and implement.

Social determinants of health include: education access and quality, healthcare access and quality, neighborhood and built environment, social and community context and economic stability. The social determinants of health are used to determine the Social Vulnerability Index (SVI) of an area. The highest possible SVI score is 1.0, any census tract with a score of 0.75 or higher is considered vulnerable based on low performing indicators in the following areas: high poverty rates; high disability rates; high number of households with children; single parent households; high population of minority residents; high concentration of multi-unit, rental and mobile homes and limited access to transportation. Middletown Connect has identified three focus census tracts in Middletown (census tracts 130, 131 and 132) with SVI scores all greater than 0.091.

Fifty-six percent of Middletown's sixteen census tracts are considered vulnerable. Life expectancy varies by more than twelve years across census tracts. This project will focus on three particularly vulnerable, contiguous census tracts and includes tract 131 which has the lowest life expectancy in the city.

Data reveals that the total population of Middletown is 50,987. The total population for the focus census tracts is 7,174 or 14.07% of the total population of Middletown. In 2019 these three census tracts accounted for 41.05% of all overdoses, 18.21% of all suicides and 50.00% of all homicides. Middletown Connect is gathering input and feedback from the residents within the focus census tracts to identify barriers to achieving health by holding community conversations. The HIP Teams assist by providing knowledge about the resources/services and the prevention programs that are already underway that could be brought to these focus census tracts. HIP Teams will identify policy changes that can be made by their organization to increase access, engagement and utilization to their resources and services.

Middletown Connect asks that city leaders be open and willing to hear from them as they go through the process and consult with OHIZ Project Core Team as plans within these census tracts are made so that efforts may be aligned.

Discussions

Mr. Bonnell asked what type of business would be of the most benefit to one of these census tracts.

Ms. Duritsch stated that data is still being collected to try to determine that answer. They are finding that access to fresh food and a laundromat is a recurring concern in those areas.

Mayor Condrey asked how much money the grant provides.

Ms. Duritsch stated that the grant is \$300,000.

OLD BUSINESS

PHAB

Ms. Phillips Carter informed the BOH that PHAB has granted CMHD accreditation status.

NEW BUSINESS

Travel Authorizations

There were no travel authorizations requested.

Motion to Read MBHE Ordinance No. 2022-06 and MBHE Ordinance No. 2022-07 by Title Only and Declaring an Emergency

Motion: Mr. Schul moved, seconded by Ms. Kash to read MBHE Ordinance No. 2022-06 and MBHE Ordinance No. 2022-07 by title only and declaring an emergency.

Roll call vote: Yes-4 (Davis, Kash, Bonnell, Schul). No-0. **Motion Passed.**

Approval of MBHE Ordinance No. 2022-06-Pay and Benefits

Ms. Phillips Carter stated that City Council has approved the 2023 Pay and Benefits, it needs to be approved by the Board of Health.

Motion: Ms. Kash moved, seconded by Mr. Schul to approve MBHE Ordinance No. 2022-06-Pay and Benefits.

Roll call vote: Yes-4 (Davis, Kash, Bonnell, Schul). No-0. **Motion Passed.**

Approval of MBHE Ordinance No. 2022-07-Health Department Budget

Motion: Mr. Schul moved, seconded by Ms. Kash to approve MBHE Ordinance No. 2022-07.

Roll call vote: Yes-4 (Davis, Kash, Bonnell, Schul). No-0. Motion Passed.

Approval of Lease Agreement-City of Middletown, Middletown Board of Health & Environment and Butler County Health Consortium aka Primary Health Solutions

Ms. Phillips Carter stated that this is a renewal of an agreement that has been in place for several years regarding Primary Health Solution's building lease.

Motion: Ms. Kash moved, seconded by Ms. Davis to approve the Lease Agreement.

Roll call vote: Yes-4 (Davis, Kash, Bonnell, Schul). No-0. Motion Passed.

2023 Board of Health Meeting Dates

Board of Health Meetings are held the second Tuesday of each month at 7:30am, a calendar of 2023 meeting dates was included in the BOH packet.

REPORTS
Health Commissioner

Ms. Phillips Carter stated that the OHIZ grant is exciting and informed the board that HIP partners are looking at new ways of bringing the community together while focusing on innovative ways to increase health outcomes.

Ms. Phillips Carter stated that she continues to work with city leaders on addressing the unhoused. Shalom is scheduled to be operating by January 1, 2023.

Medical Director

In Dr. Jennewine's absence, Ms. Corbin reported the communicable diseases for November 2022.

Chlamydia infection	27
COVID-19	320
Gonococcal infection	9
Hepatitis B	4
Hepatitis C	6
HIV	2
Influenza-associated hospitalization	16
Pertussis	1
Streptococcus pneumoniae-invasive	2
Syphilis	1

Director of Nursing

Ms. Corbin informed the board that there has been an increase in cases of influenza. There were 16 hospitalizations in November due to flu, there have already been 15 hospitalizations due to flu in December. Ms. Corbin stated that CMHD continues to offer the flu vaccine in addition to COVID vaccines at the bi-weekly vaccine clinics.

Ms. Corbin stated that CMHD is currently only offering the Bivalent Moderna COVID vaccine. Ms. Corbin continued that it has now been two years since the COVID vaccine was approved for administration, to date there have been 11,498 doses of COVID vaccine administered in Middletown.

Ms. Corbin informed the board that there is currently a measles outbreak in Columbus, Ohio.

Environmental Director

Ms. Ealy informed the board that CMHD is currently in the process of collecting license renewal fees and issuing permits for household septic systems and septic businesses (haulers, installers and service providers) as well as collecting license renewal fees and issuing licenses for tattoo/body art.

Ms. Ealy stated that CMHD has received and approved plans for Fatty's Patties and a new micro market in Phoenix Metals.

Ms. Ealy stated that the City Jail inspection was completed this month.

In a follow-up to the septic system discussion at the November BOH meeting, Ms. Ealy informed the board that CMHD has reached out to several other local health departments to discuss their procedures regarding drywells.

Ms. Ealy informed the board that she has met with Primo, a new steak house that will be located on Central Avenue and there is a soft opening planned for Valentine's Day 2023.

Discussions

Ms. Kash informed the board that she had participated in a ride-along with the City of Middletown Police Department and stated that it was a very enlightening experience especially in regards to the unhoused situation.

ADJOURNMENT

The meeting was adjourned at 8:23 AM. The next meeting will be held on January 10, 2023 at 7:30 AM.

Jacquelyn D. Phillips Carter, MPH, BSN, RN
Secretary

Nicole Condrey, President
City of Middletown Board of Health

AGREEMENT FOR FACILITY USE

This Agreement for Facility Use (this "Agreement") is made and entered into between the BOARD OF EDUCATION OF THE MIDDLETOWN CITY SCHOOL DISTRICT, hereinafter referred to as "**Property Owner**"; and the CITY OF MIDDLETOWN BOARD OF HEALTH, hereinafter referred to as "**Health Board**".

RECITALS

WHEREAS, **Property Owner** operates various buildings as part of the Middletown City School District (the "Facilities") located in Middletown, Ohio

WHEREAS, **Health Board** desires, when it deems reasonably necessary, to establish a Point of Dispensing (POD) Site for mass prophylaxis at one or more of the Facilities.

Now, therefore, it is mutually agreed by and between the parties as follows:

1. Mass prophylaxis is the capability to protect the health of the population through the administration of critical interventions in response to a public health emergency in order to prevent the development of disease among those who are exposed or are potentially exposed to public health threats. **Health Board** may only use the Facility under this Agreement as a POD Site for the purpose of mass prophylaxis.
2. After meeting its responsibilities to its faculty, staff, and students, **Property Owner** agrees that it will permit **Health Board**, to the extent reasonably possible and upon request of **Health Board** as specified in this Agreement, to use of the Facility on a temporary basis for a POD Site.
3. The parties have designated their respective contact person(s) who have authority for implementing this Agreement (identified below). The parties can hereafter designate different contact persons upon written notice to the other party.

Property Owner:

Name: Randy Bertram
Title: Treasurer
Phone: 513-423-0781
Email: rbertram@middletowncityschools.com

Health Board:

4. **Property Owner** agrees that it will, prior to releasing the Facility to **Health Board** for use, evaluate the Facility and secure valuable property not required for **Health Board** activities, to the extent reasonably possible.
5. The parties agree to exercise reasonable care in the conduct of its activities under this Agreement, and to reasonably supervise, care, and control all of their respective employees, contractors, and volunteers during any mass prophylaxis event at the Facilities. **Health Board** shall to the maximum extent permitted

15. The term of this Agreement shall commence on the date it is completely executed by both parties, and shall continue uninterrupted until December 31, 2024, unless earlier terminated.

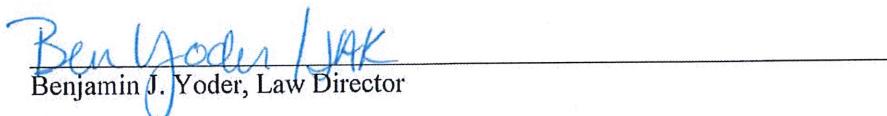

16. All amendments or modifications of this Agreement must be in writing and signed by authorized representatives from both institutions.

In witness thereof, the parties have caused this Agreement to be executed, said agreement to become effective and operational upon the affixing of the last signature hereto.

AGREEMENT BETWEEN
THE BOARD OF HEALTH OF THE
BUTLER COUNTY GENERAL HEALTH DISTRICT AND
CITY OF MIDDLETOWN HEALTH DEPARTMENT

THIS AGREEMENT is made and entered into by and between the Board of Health of the Butler County General Health District, hereinafter referred to as the "Board," and the City of Middletown Health Department, hereinafter referred to as the "Contractor."

WITNESS TO:

WHEREAS, the public health leadership in each of the respective health districts of Butler County and the cities of Hamilton and Middletown desire to work together to accomplish the Butler County Community Health Assessment.

NOW, THEREFORE, for and in consideration of the mutual promises, covenants, and agreements herein contained, the parties hereto mutually agree as follows:

Section 1. Scope of Services

A. Contract Requirements

1. Contractor will coordinate with the Board to complete the Butler County Community Health Assessment.
2. The contractor will share the cost of conducting the Butler County Community Health Assessment at the rate of 13% of the total cost of \$28,140.00 based on the contractor's population.
3. The final product, a Butler County Community Health Assessment, in addition to any data collected, shall be the property of the Butler County General Health District, City of Hamilton and the City of Middletown.

Section 2. Term

This agreement shall be effective from the date it is executed by the parties and shall continue in effect through **June 30, 2023** unless terminated as provided in this Agreement. Services eligible for payment under this Agreement shall be performed on or after **November 1, 2022** to **June 30, 2023**, and which are timely invoiced as provided in this Agreement.

Section 3. Compensation and Method of Payment

A. Compensation:

1. The Contractor agrees to pay the Board up to but not in excess of **\$3,658.00**, as full and complete compensation for the Contractor's share of the cost of the Butler County Community Health Assessment.
2. Payment will be reimbursed upon submission of quarterly invoices and supporting documentation by the Board to the Contractor.

B. Method of Payment:

1. Payment will be made by the Contractor as the Board submits quarterly invoices for the reimbursement of expenditures for activities performed under this Agreement.
2. Any periodic payments from the Contractor specified in this Agreement will be contingent upon performance of contractual obligations to date, including the proper receipt of supporting invoices, reports, statements, or any other supporting information as required by the Contractor in this Agreement.

Section 4. Amendments

Any revisions in the Agreement will require the express approval of the Board and the Contractor, and shall be by written instrument signed by an authorized representative of each party.

Section 5. Termination

This Agreement may be terminated with or without cause and without liability by either party by sending a written notice of termination to the other party thirty (30) days prior to the date of termination (hereinafter, the "Termination Date") set forth in the notice. If this Agreement is terminated, the Contractor agrees to pay the Board for all work performed and expenses incurred up to the Terminate Date. Upon termination, the Board shall provide the Contractor with all documents (written, digital, electronic, etc.) produced up until the Terminate Date.

Section 6. Conflict of Interest

The Contractor agrees that no officer, employee, or agent of the Board who exercises any functions or responsibilities in connection with the planning and carrying out of the program, nor any immediate family member, close business associate, or organization

which is about to employ any such person, shall have any personal financial interest, direct or indirect, in the Contractor or in this Agreement and the Contractor shall take appropriate steps to assure compliance with this provision.

Section 7. Notices

Service - This Agreement requires that all notices shall be personally served or sent by U.S. mail, postage prepaid, addressed to the parties as follows:

To the Board:

Health Commissioner
Butler County General Health District
301 S Third Street
Hamilton, OH 45011

To the Contractor:

Health Commissioner
City of Middletown Health Department
One Donham Plaza
Middletown, OH 45042

Section 8. Waiver

This Agreement shall be construed in a manner that a waiver of any breach of any provision of this Agreement shall not constitute or operate as a waiver of any other breach of such provision or of any other provisions, nor shall any failure to enforce any provision hereof operate as a waiver of such provision or of any other provision.

Section 9. Severability

This Agreement shall be severable, so if any part or parts of this Agreement shall for any reason be held invalid or unenforceable by a court of competent jurisdiction, all remaining parts shall remain binding and in full force and effect.

Section 10. Entire Agreement

This Agreement and any Exhibits attached hereto contain the entire contract between the parties as to the matters contained herein. Any oral representations or modifications concerning this Agreement shall be of no force and effect.

This space intentionally left blank

Section 11. Authority

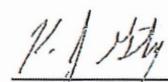

The persons signing this Agreement represent and warrant that they are authorized to represent their respective parties and to execute this Agreement on behalf of the party that they represent.

IN WITNESS WHEREOF, the Board and the Contractor have executed the Agreement on this _____ day of _____, 2022. *2023*

Butler County Monthly Communicable Disease Surveillance Report

December of 2022

Leah Elliott, MPH, Epidemiologist
ElliottL@butlercountyohio.org

Notifiable Communicable Diseases

Summary:

- Number of Disease Cases Reported in Butler County: 2,757
- Most Frequently Reported: COVID-19, Influenza-Associated Hospitalizations, Chlamydia, Hepatitis C, and Gonococcal infection.

Table 1. Comparison of Reported Cases of Confirmed or Probable Notifiable Communicable Diseases, December 2022 (excluding Chlamydia infection and gonorrhea)

	Reported Cases	Rate per 100,000	Rate Ratio	Confidence Interval
State of Ohio (excluding BC)	75,242	665.9		
Butler County	2,629	673.5	1.011	0.973-1.051

Interpretation: The residents of Butler County were 11.0% more likely to be the subject of a notifiable disease report when compared to the rest of Ohio as a whole. These results are not statistically significant. (excluding Chlamydia infection and Gonorrhea)

Table 2.* Communicable Diseases by Jurisdiction (December 2022)

Jurisdiction	Count	Rate per 100,000	Change from Previous Month
Butler County General Health District	1,797	651.2	↑53.3% from November 2022 (n=1,172)
Middletown City Health Department	441	864.9	↑13.7% from November 2022 (n=388)
City of Hamilton Health Department	519	818.6	↑49.6% from November 2022 (n=347)
Butler County (all inclusive)	2,757	706.5	↑44.6% from November 2022 (n=1,907)

Table 3.* Butler County Reportable Diseases by Subgroups (December 2022)

Reportable Disease Subgroup	Count	Trend
Viral Hepatitis (B and C)	52	↑26.8% from November 2022 (n=41)
Sexually-Transmitted Infections (Chlamydia infection, Gonorrhea, Syphilis and HIV)	113	↓ 19.9% from November 2022 (n=141)
Enteric Diseases (Hepatitis A, Amebiasis, Campylobacteriosis, Cryptosporidiosis, Cyclosporiasis, STEC, Giardiasis, Salmonellosis, Shigellosis, Vibriosis and Yersiniosis)	8	No change from November 2022 (n=8)
Vaccine-Preventable Diseases (COVID-19, influenza-associated hospitalizations, <i>Haemophilus influenzae</i> , Bacterial meningitis, Mumps, Pertussis, invasive <i>Streptococcus pneumoniae</i> , Tetanus, and Varicella)	2,563	↑50.2% from November 2022 (n=1,706)

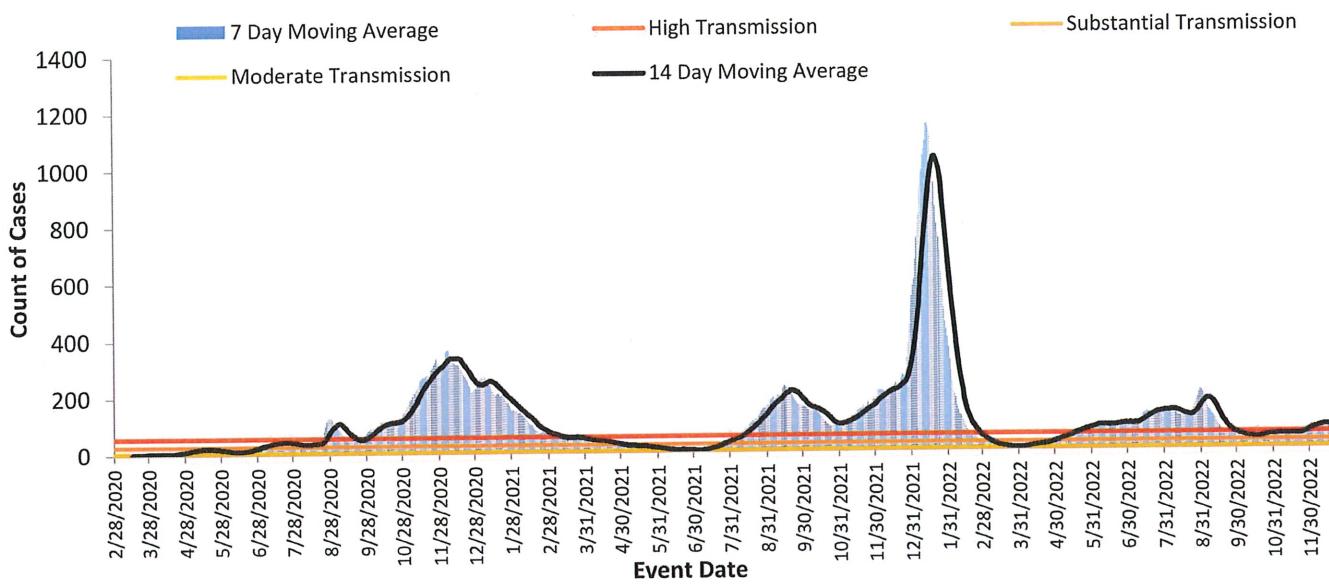

*Data is provisional and subject to change – Table 1 does not include gonorrhea or Chlamydia infection due to the high likelihood of duplicate cases and co-infections. Suspected, probable, & confirmed cases are included in counts for Tables 2-4 except for cases of arboviral encephalitis such as Zika virus disease, of which only probable and confirmed cases are reported and Novel Influenza A of which only confirmed cases are reported.

**COVID-19 cases are sorted by Event Date (the earliest public health knows about the case). All other reportable diseases are sorted by Date Reported to ODH. This is due to the data entry delay that occurred during the fourth wave of COVID-19. Report reflects time period of December 1-31, 2022 unless otherwise noted. Table 6 includes only probable and confirmed cases. Data accessed from the Ohio Disease Reporting System (ODRS) on 1/4/2023.

Table 4.* Diseases Reported in Butler County (December 2022)

Jurisdictions	Butler County General Health District	Middletown City Health Department	City of Hamilton Health Department	Butler County (all inclusive)

Butler County General Health District
Seasonal Influenza-Associated Hospitalizations Report
MMWR Week 52
12/25/2022 – 12/31/2022

Weekly Influenza-Associated Hospitalizations Activity Summary:

Butler County (MMWR Week 52, ending on 12/31/2022):

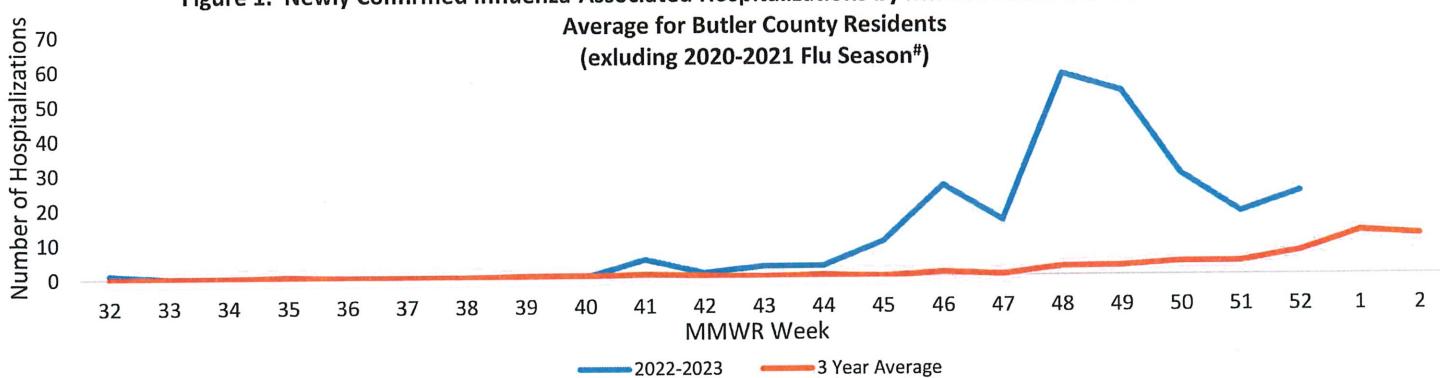

The current influenza season has far exceeded historical trends and along with other respiratory viruses, are placing a strain on Southwest Ohio's healthcare systems. Butler County saw 24 confirmed influenza-associated hospitalizations for the MMWR week ending 12/31/2022. This is a **↑33.3%** increase from the previous week. The 3-year average for this time of year is 6.7 influenza-associated hospitalizations. Receiving the influenza vaccine is the best way to reduce the chance of illness and complications, including those resulting in hospitalization and death.

Southwest Ohio Weekly Surveillance

Figure 5. Newly Confirmed Influenza Associated Hospitalizations by MMWR Week with Past 3 Year Baseline Average for Southwest Ohio (excluding 2020-2021 Flu Season)

Data is provisional and subject to change due to delays in reporting. Report reflects the period of 08/07/2022 – 12/31/2022 (MMWR Week 32 to Week 52 of 2022). Data accessed from the Ohio Disease Reporting System (ODRS) on 01/05/2023. *3 year average does not include the 2020-2021 flu season. *Southwest Ohio includes hospitalizations from the following counties and their respective jurisdictions: Adams, Brown, Butler, Clermont, Clinton, Hamilton, Highland and Warren.

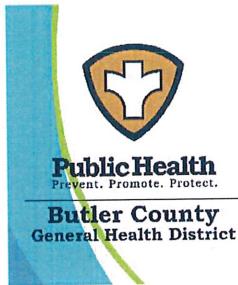

2022-23 Influenza Season Week 51 ending Dec 24, 2022

Sources of Influenza Surveillance Data

Influenza-associated Hospitalizations (ODRS): Influenza-associated hospitalizations are reported to local health departments for entry into the Ohio Disease Reporting System (ODRS). Hospitalizations can be used as an indicator of the severity of illness during a particular influenza season. This condition became reportable in 2009.

For further information or questions, please contact:
Butler County General Health District, 513-863-1770

Butler County General Health District's 149th COVID-19 Update (12/31/2022)

Confirmed and Probable COVID-19 Cases Reported to Butler County*

Butler County Residents, 2020-22

Total # of Cases (12/31):	115,208*
ODH verified Deaths (12/31):	1,224**
Hospitalizations (12/31):	3,826
First Case Reported:	3/11/2020
Last Case Reported (so far):	12/31/2022
Confirmed Cases:	82,514
Probable Cases:	32,694
Age Range:	<1-103
Median Age:	37
Mean Age:	38.8
Incidence (thru 12/31):	29,513.5 per 100,000
Prevalence (thru 12/31):	29.5% of BC population
7-Day Positivity Rate (01/05):	13.2% of tests performed in BC

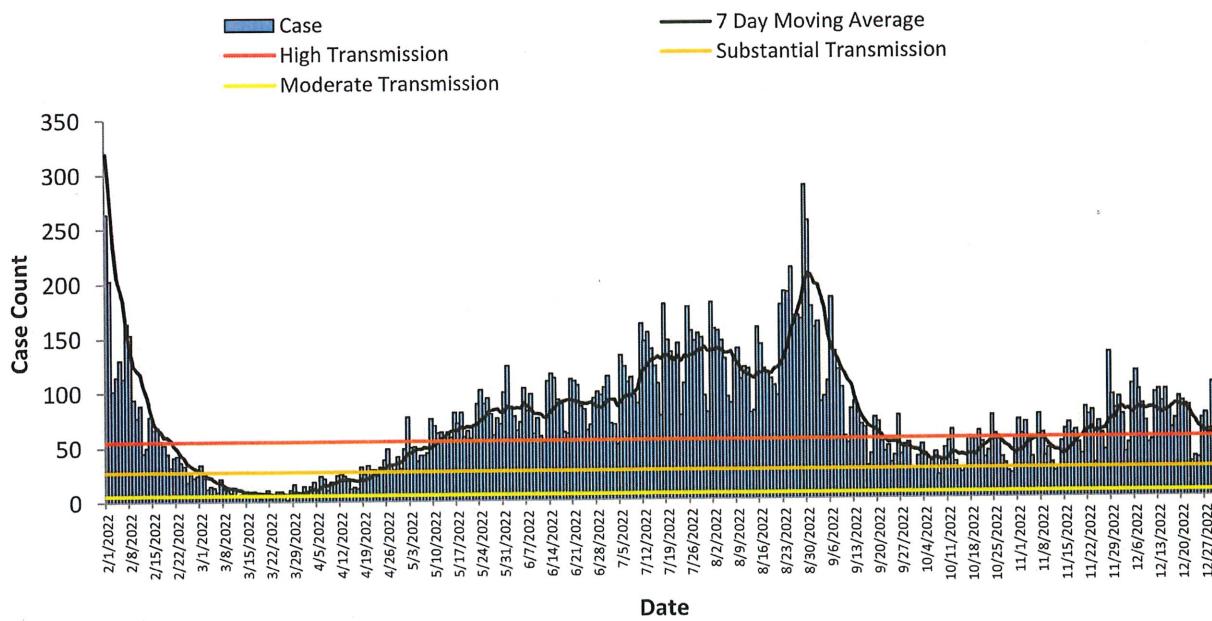

Table 1: CDC Indicators

Indicator	Butler County New Cases over 7 days	Status Level
Community Level	-	MEDIUM
Positivity Rate	13.2% of tests performed in Butler County	HIGH Positivity (Over 9.99% of tests)
Incidence per 100,000 population	115.5 per 100,000	HIGH Spread (Over 99.99 per 100,000)

The Butler County General Health District will continue to monitor transmission levels based on previous CDC indicators; however, generalized guidance will now be based on the CDC's Community Level indicators.

Based on the criteria for community levels and Butler County's figures, Butler County is at **Medium community levels** and **HIGH transmission**.

Figure 1. Cases by Date of Event Since February 1, 2022

All figures show reported cases of COVID-19 in Butler County as of 0800 EDT 01/05/2022. Due to delays in reporting, the numbers of confirmed and probable cases on all figures are subject to change between reports and confirmed and probable case counts are likely to increase. *This should not be assumed to be the total disease burden of COVID-19 in Butler County only those that have been laboratory confirmed OR meet ODH probable case criteria AND reported to Public Health.

**Data is provisional – only confirmed or probable COVID-19 cases are included in counts. Report reflects time period since the introduction of SARS-CoV-2 into humans, measured in days. Data accessed from the Ohio Disease Reporting System (ODRS) on 01/05/2022 at 0800 EDT.

**Deaths are now reconciled to the Ohio Department of Health's available data to avoid discrepancies between the state and local numbers. ODH's protocol has changed to avoid reconciliation errors and now only includes those deaths that have been reconciled with Vital statistics and may not match what has been reported to the CDC which are provisional numbers. This is a lagging indicator and will be multiple weeks behind.

45064	471	2	100.0%		0.4%
45246	213	1			0.2%
45062	173	0			0.2%
Cases lacking zip code information or from zip codes with too few cases	2,325				2.0%
Butler County (inclusive)	114,728	451	-33 (-6.82%)	HIGH	100%
Zip-codes that have no transmission rates have most of their populations outside of Butler County. Zip-codes with too few cases have been removed for privacy concerns.					
New Cases are determined by "Date of Event" which is when the case was ill/test was collected. CDC determines new cases by "Date of Report".					

Table 2 shows the zip-code level data that is new for this week.

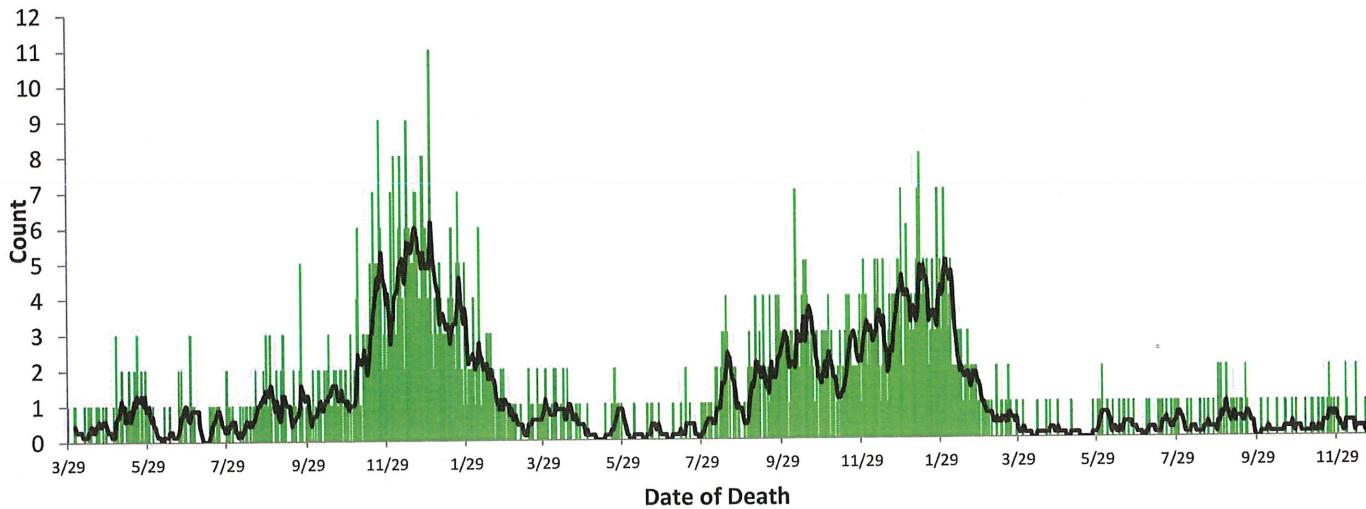

All figures show reported cases of COVID-19 in Butler County as of 0800 EDT 01/05/2022. Due to delays in reporting, the numbers of confirmed and probable cases on all figures are subject to change between reports and confirmed and probable case counts are likely to increase. *This should not be assumed to be the total disease burden of COVID-19 in Butler County only those that have been laboratory confirmed OR meet ODH probable case criteria AND reported to Public Health.

*Data is provisional – only confirmed or probable COVID-19 cases are included in counts. Report reflects time period since the introduction of SARS-CoV-2 into humans, measured in days. Data accessed from the Ohio Disease Reporting System (ODRS) on 01/05/2022 at 0800 EDT.

**Deaths are now reconciled to the Ohio Department of Health's available data to avoid discrepancies between the state and local numbers. ODH's protocol has changed to avoid reconciliation errors and now only includes those deaths that have been reconciled with Vital statistics and may not match what has been reported to the CDC which are provisional numbers. This is a lagging indicator and will be multiple weeks behind.

Public Health Service

Centers for Disease Control
and Prevention (CDC)
Atlanta GA 30329-4027

December 30, 2022

Jacquelyn Phillips Carter, MPH, BSN, RN
Health Commissioner
City of Middletown Health Department
One Donham Plaza
Middletown, Ohio 45042

Dear Jacquelyn Phillips Carter:

On behalf of the Centers for Disease Control and Prevention (CDC), we are pleased to congratulate the City of Middletown Health Department on its accreditation by the Public Health Accreditation Board (PHAB).

Your national accreditation status lets your partners and community know that your organization meets national standards and provides services that all residents should come to expect from their health departments. Moreover, because the national accreditation program seeks to improve the quality and performance of all health departments, your participation in this program indicates your commitment to the continuous improvement of your health department's services.

Your accreditation from PHAB is an impressive achievement. CDC recognizes the time and effort that leaders and staff members from all levels of your health department have dedicated to this effort. We commend the City of Middletown Health Department for this achievement.

Sincerely,

Rochelle P. Walensky, MD, MPH
Director, CDC

Celeste Philip, MD, MPH
Acting Director, Center for State, Tribal,
Local, and Territorial Support, CDC

National Birth Defects Prevention Month was founded in 1997. The purpose of this observance each year is to protect future generations by spreading knowledge regarding birth defects, preventing birth defects, and to garner support for those families affected by birth defects.

Below are some quick facts regarding birth defects:

- Each year, a total of 120,000 babies *in the United States are born with a birth defect*. That equates to 1 in every 33 births, or every 4 ½ minutes a baby is born with a birth defect in the U.S.
- Birth defects can be identified prior to birth, at the time of birth, or any time after birth. Some are immediately visible, such as cleft lip, other birth defects are found using special tests, such as with hearing loss.
- Though any women can have a baby born with a birth defect, there are predisposed conditions that can be managed to help lower risks of birth defects. Working with your healthcare provider and starting prenatal care as soon as you are pregnant is very important.
- Know your family history of birth defects as genetics can affect the chances of having a child born with a birth defect.
- Smoking, drinking alcohol, and taking certain drugs during pregnancy should be avoided to lower birth defect risks.
- An elevated body temperature due to fever or heat exposure or having certain infections during pregnancy can result in birth defects. Take care of yourself! As the mother your health is important and crucial to a healthy baby!

Stop by Your City of Middletown Health Department door for additional education regarding birth defects to help spread awareness during the month of January.

DeWine vetoes bill that would have banned cities from regulating flavored tobacco

Posted at 11:04 AM, Jan 05, 2023

and last updated 11:28 AM, Jan 05, 2023

COLUMBUS, Ohio — Ohio Governor Mike DeWine vetoed a bill Thursday that would have banned cities from regulating smoking, vaping and other e-cigarette usage and sales that was put forward after Columbus banned flavored tobacco products.

“This measure is not in the public interest, therefore, just a few minutes ago, I vetoed this bill,” DeWine announced Thursday morning at a news conference.

He said that he understands the desire for uniformity across the state with laws, so he proposed a statewide ban on flavored tobacco products.

"We will save a lot of children," he said.

House Bill 513 originally only dealt with tobacco and nicotine products taxes, allowing a distributor to obtain a refund of excise taxes remitted on certain bad debts.

One day after Columbus banned flavored tobacco products, saying the corporations responsible for them have targeted children and Black Americans, state representative Jon Cross (R-Kenton) added a provision to the bill to prevent any city or municipality from regulating smoking, vaping and other e-cigarette usage and sales.

"We want to sit there and say, 'Oh, don't get fat, we're going to cancel double cheeseburgers,'" Cross said during debate of the bill, seemingly imitating a local government official.

During the nearly 17-hour marathon debate session last month, the lawmaker argued this could cause cities like Cleveland, Cincinnati and Columbus to ban anything considered unhealthy.

"We're going to get rid of the Big Gulp," he argued, still mimicking, while lawmakers sitting behind him stifled laughter. "No 32-ounce Cokes."

Ohio Mayors Alliance Executive Director Keary McCarthy said the argument isn't really about soda, fast food or even flavored vapes. It is about local rule.

"There has been a growing trend of provisions passed by the state Legislature that very directly conflict with home rule in Ohio," McCarthy said.

Municipal home rule allows cities and villages in Ohio to have the constitutional right to certain powers, including establishing laws in accordance to the self-government clause. If something doesn't interfere with laws in the Ohio Revised Code, cities have the right to make their own policies, Keary argued, citing Section 3.

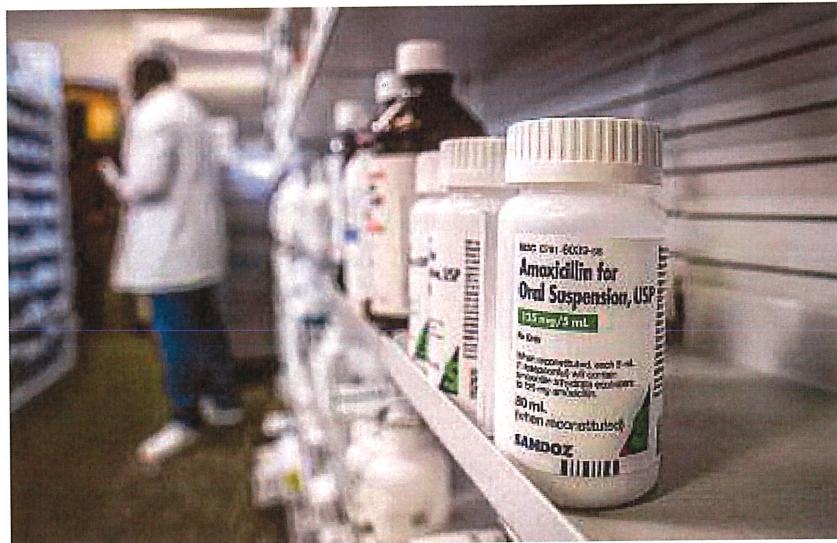

"When the heavy hand of state government comes down from central Ohio, from Columbus, our capital city, and says, 'Oh, you can't do it this way, you have to do it this way,' it conflicts with that sacred right to home rule that is embedded in our Constitution," he added.

Lawmakers have started to strip powers away from municipalities, which can be seen with [this new tobacco bill](#), but also with bills to prevent gun safety measures, plastic bag bans and teaching about race in school. The Ohio Municipal League has been tracking 22 bills in total this session that it believes overstep its rights, or at least are "of interest."

Thursday's veto was the second of legislation passed during the last legislative session. Earlier this week, DeWine rejected HB 286, which would have allowed legal challenges for certain agency orders to occur in the county where a business or a person resides.

Amoxicillin shortage a concern for parents of young children

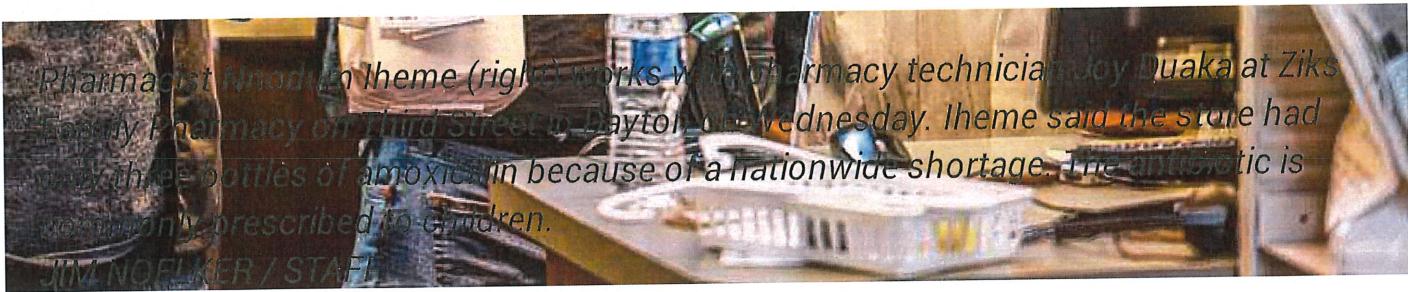

Senator wants Biden administration to address problem

A surge in RSV and flu in children is increasing demand for amoxicillin, as those illnesses can cause secondary infections.

JIM NOELKER / STAFF

BY SAMANTHA WILDOW - STAFF WRITER

CLOSER LOOK

U.S. Senator Sherrod Brown, D-Ohio, is urging the Biden administration to address the shortage of amoxicillin impacting mostly pediatric patients, calling for the creation of a drug shortage task force. Brown also called for support of his bill to establish a stockpile of active pharmaceutical ingredients for essential medicine to avoid future shortages.

"No child should have to wait – trying to battle a simple infection that turns into something much worse – because they couldn't get the medicine they need," Brown said on Wednesday. "It's past time to take steps to ensure our medical supply chains can accommodate increased demand for a common, potentially lifesaving drug and give families peace of mind."

Amoxicillin is a common antibiotic used to treat childhood illnesses like ear infections and pneumonia. The U.S. Food and Drug Administration reported a shortage of the liquid version of the drug last month due to increased demand, and the shortage primarily affects pediatric patients.

There are alternative medicines, but pharmacists are seeing those supplies decrease. There is only one licensed maker of amoxicillin in the U.S., Brown said.

The majority of generic drugs and pharmaceutical ingredients are made outside of the U.S. About 28% of manufacturers of active pharmaceutical ingredients are in the U.S., according to the FDA. Among other sources, 26%

are in Europe, 18% in India, 13% in China, 2% in Canada, and the remaining ingredients in other parts of the world.

Chad Meyers, a pharmacist and the director of Ambulatory Pharmacy Services at Dayton Children's Hospital, said his department began hearing from patients' families about the difficulty they had in finding amoxicillin about two months ago.

When alternatives started drying up this month, the pharmacy turned to making compounded versions of those products from FDA-approved tablets and capsules for their pediatric patients who cannot ingest tablets or capsules, which is not something all pharmacies have the capability to do, Meyers said.

"The shortage of amoxicillin is an ongoing challenge for community pharmacies and families with young children,"

Meyers said.

"We've had families drive almost an hour because the Dayton Children's pharmacy was the only one that had amoxicillin available for their child. We are grateful we have the capability to go above and beyond in making sure we have viable antibiotic treatment options available for all children within our reach."

The amoxicillin shortage has caused increased wait times, reduced curbside services and increased work hours at pharmacies.

Dr. Kevin Turner, a pediatrician at University Hospitals Rainbow Babies and Children's and the senior medical director at Rainbow Primary Care Institute at University Hospitals in Cleveland, said using alternatives can also lead to delays and potential errors.

The increased work of doctors and pharmacists is also bogging down a system that is already seeing increased illnesses, he said.

While amoxicillin is not used to treat the ongoing surge of RSV and increasing influenza cases, those illnesses are leading to increased infections.

"That's leading to increases in our antibiotic prescriptions,"

Turner said. Amoxicillin is the most commonly prescribed antibiotic in general, particularly for pediatric patients, he said.

Joy Duaka, a pharmacist at Ziks Pharmacy on East Third Street, said his store on Wednesday only had three bottles of liquid amoxicillin left in the store due to the nationwide shortage.

While the FDA has reported fewer drug shortages, Meyers said the shortages that are happening are the medications patients use the most.

Brown and other senators, including Amy Klobuchar, D-Minn.; Bill Cassidy, R-La.; and Edward Markey, D-Mass., sent a letter to Secretary of Health and Human Services Xavier Becerra and FDA Commissioner Robert Califf, asking both agencies to start a drug shortage task force.

"We write to express our strong concern regarding the shortage of amoxicillin and the serious threat that this and other medical shortages pose to our nation's patients and public health," the senators said.

"The record-high levels of respiratory illnesses have spiked demand for amoxicillin and other essential medicines, and patients and providers continue to experience disruptive shortages, which have led to delays in care and compromised health outcomes."

Brown also discussed his bill, Promoting Readiness and Ensuring Proper Active Pharmaceutical Ingredient Reserves of Essential Medicines Act of 2021. The PREPARE Act, or Senate Bill 2740, would create an emergency supply of key ingredients used in essential generic medicines and incentivize domestic manufacturing of these ingredients to build a more resilient domestic supply chain.

Flu season shows an 'alarming trend' across region, say health officials

Montgomery County flu hospitalizations are the highest in Ohio.

BY SAMANTHA WILDOW - STAFF WRITER

CLOSER LOOK

The flu is continuing to hit the region hard as the latest data from the state shows Montgomery County hospitals experiencing the most flu-associated hospitalizations.

"Influenza is off to a very early and rapid start," said Dr. Roberto Colon, chief medical officer of Miami Valley Hospital.

Montgomery County has had 295 flu hospitalizations, which is about 20.4% of all flu-related hospitalizations in the state, at a rate of 54.9 cases per 100,000 individuals, according to the Ohio Department of Health.

"The hospitalizations are still going up and the emergency department visits are still going up," said Dan Suffoletto, public information manager for Public Health - Dayton and Montgomery County.

Other counties in the Dayton region are experiencing a rise in the flu, with Clark County seeing a total of 93 hospitalizations this season, a rate of 68.38 hospitalizations per 100,000 people.

Butler County reported 58 hospitalizations; Greene County, 49; Warren

County, 33; and Miami County, 22. Other Dayton-area counties have had fewer than 10 hospitalizations.

The state of Ohio also reported that flu-like illnesses accounted for about 10.76% of outpatient visits, up by 52.84% from the previous week. Last week saw 391 flu-associated hospitalizations throughout the state, a decrease of 9.9%.

Colon said hospitals typically do not see a peak like the current number of hospitalizations happening until six to eight weeks later in the season.

"This is a very alarming trend," Colon said.

What's happening in Ohio and across the U.S. is also mirroring what happened in the southern hemisphere, which had a more difficult flu season than previous years.

"Clark County continues to be above the five-year average of influenza-associated hospitalizations," said Nate Smith of the Clark County Combined Health District.

Smith said the age of those who are getting hospitalized is shifting to individuals older than 50. At the beginning of the flu season, Smith said they were seeing more children under the age of 14 becoming hospitalized with the flu.

Health officials say it is not too late to get the flu shot this year, and it continues to be the best way to protect against severe flu illness.

"The best thing to do is to get a flu shot, which is going to greatly reduce the possibility of severe illness or hospitalization should an individual contract flu," Smith said.

"Other layered measures of prevention include diligent handwashing, wearing a facial covering if you're going to be indoors in close proximity of others, and staying home if you are sick or showing any symptoms of the flu."
